Programs funded by
Parenting Programs
CAPMC Parenting Programs consists of two parenting training models that assist parents and families on improving parenting skills and family relationships at home. The two programs are the Strengthening Families Program (SFP) and the Triple P (Positive Parenting Program). Both training models aim to enhance confidence in parenting and deliver effective ways to strengthen family relationships and improve behavior in children.

Through the diversity of both program models, parents within Madera County are provided an opportunity to participate in group sessions that they can attend either with their children or on their own. CAPMC offers our families a small meal or snack before each class and incentives for participation, attendance, and completion of the program. To better serve our community, these skill classes are offered in English and Spanish and are currently available in both Madera and Chowchilla.

Some Course Topics Covered Are:
- Learning Positive Interactions
- Problem Solving
- Stress & Anger Management
- Coping Skills
- Communication Skills
- Effective Discipline
- Resilience Skills
- Parent-Child Time
- Understanding Social & Developmental Stages
- Behavior Management

Strengthening Families Program
The Strengthening Families Program (SFP) involves the whole family and is one of the most powerful programs for family change in the country.

SFP is an evidence-based enrichment program that aims at improving parenting skills, family life skills and children’s social skills. SFP is available to families inclusive of parents and children ages 3-16. SFP provides 14 one-hour sessions designed to strengthen family interactions. Instruction is provided in separate skill classes for parents and children, while supporting informal family practice time by bringing parents and children together for complete family activities to enhance family skills.

All parenting programs are FREE

Triple P Positive Parenting Program
Triple P is an evidence-based, broad focus program for parents requiring intensive training in positive parenting skills and generalization enhancement strategies.

Triple P is an application of parenting skills with range of target behaviors, settings and children. Program may be offered in individual or group sessions and is covered in about 10 hours over the course of 8-10 sessions. The Triple P program is offered to parents of children ages birth to 12 years, and parents of adolescents.

Group Sessions are soon to be available in Oakhurst and individual sessions are available to qualifying families.
